TechDemocracy's Approach

We Advise:
We decipher your business challenges, align your Identity security landscape with industry trends, and chart a roadmap for efficiency, risk reduction, and digital transformation.

We Implement:
From system onboarding, migration from legacy Identity security platforms, and reengineering, we leverage industry expertise to transform your Identity Security capabilities, seamlessly.

We Operate & Support:
We manage your Identity security environment, delivering tailored outcomes and continuous improvement insights.

We provide Managed Services:
Beyond support, we ensure your Identity security ecosystem stays agile for your evolving digital business needs.

How TechDemocracy Delivers

- Frictionless Onboarding
- 24/7/365 Identity Governance
- Unbeatable pricing paired with on time deliveries
- 300+ Identity Specialists
- Center of Excellence (COE) that expedites the delivery cycle
- 50+ IDM reusable Assets and Accelerators
- Global Cyber Operate Delivery Centers

Our Partnership with SailPoint

- Dedicated SailPoint Center of Excellence
- 100+ SailPoint skilled consultants
- Implementation experience of IIQ, Identity Now, FAM and Cloud Identity solutions
- Tailored solution for Healthcare, Banking, Financial, Telecom and Insurance industries
- Optimize implementation using TechDemocracy utilities such as Swift AppOnboarding, App Sync and more
- Hybrid delivery model (Onshore/Offshore/Nearshore) to reduce the implementation cost

Utilities and Accelerators

The following tool kits are included as part of the TechDemocracy IAM Accelerators:

SwiftAppOnboarding

It allows numerous applications to quickly onboard to the IGA Platforms. Automated onboarding of applications helps alleviate the challenges:

- Reduced operational cost
- Faster delivery speed
- Eliminate human error

AppDataSync

This accelerator allows quick and error-free reconciliation of application accounts and access to IGA Platforms. Automated data process for the reconciliation of disconnected applications aids alleviating the challenges and providing the following benefits:

- Reduced operational cost
- Faster and error-free synchronization of data
- Eliminates human error

Legacy IDM to IGA Migration

Modernizing IGA solution with an open-source identity governance platform empowers enterprises to create an identity-enabled organization using data, applications, and devices:

- Cost-effective and quick migration to modernized IGA Solution compared to systematic identity manager
- Upgrades are streamlined
- On-prem deployments incur low hardware costs
- Less-cost for sustainability
